**DETAILED ACTION**

***Response to Amendment***

1. Applicant's amendment and remarks received 21 June 2007 have been entered.

***Allowable Subject Matter***

2. Claims 1-19 are allowed.
3. The following is an examiner's statement of reasons for allowance: Regarding independent claim 1, the prior art of record neither shows or suggests a display using a photoluminescence quenching device comprising, in addition to other limitations of the claim, an excitation light source projecting light to an emitter layer; an electrical field formed between first and second electrodes which controllably quenches photoluminescence light from the emitter layer; and a dielectric mirror, wherein light emitted from an excitation light source passes through the dielectric mirror, and the dielectric mirror reflects light emitted from the emitter layer toward an exterior of the display. Due to their dependency upon independent claim 1, claims 2-19 are also allowable.
4. The subject photoluminescence device described above is provided for producing a display which does not require color filters and has low optical losses. The design is new and unique to the art.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
